CATCH CHAIR

NEW EDITION: SWIVEL BASE

&tradition CATCH CHAIR by Jaime Hayon - Swivel base

CATCH CHAIR, Jaime Hayon's first contribution to &tradition's collection, launched last year and has already proven to be a great success. It won the prestigious Best of the Year Award 2013 in the category of Seating: Contract/Conference from the American magazine Interior Design and it starred in exhibitions such as the Jaime Hayon retrospective Funtastico at the Groninger Museum, showcasing some of the celebrated designer's finest pieces.

Now CATCH CHAIR is introduced in a new swivel base edition, making the comfortable chair even more flexible and suited for the contract and conference market.

The new swivel base enhances the chair's light and playful expression and serpentine lines and acts as the perfect base for the high quality shell. The swivel base is in cast aluminium and the shell is made from molded polyurethane foam with a metal frame and glass fiber reinforcements. Covered in cold cured foam, and finally, leather or textile upholstery, the shell offers comfort and great variability.

Launching at: IMM Cologne - Pure Edition, Maison & Objet, Stockholm Furniture Fair

Materials: Molded polyurethane foam with glass fiber reinforcements, steel, cold cured foam, cast aluminium base in polished or black powder coating, Kvadrat fabric or CA-MO leather upholstery.

Dimensions: H: 900mm, D: 580mm, W: 580mm, Armrest height: 680mm, Seating height: 450mm

Design date: 2013/2014
