PASSEPARTOUT

BY JAIME HAYON
2016

“As a designer, you normally want your designs to be noticed,” laughs Spanish artist / designer Jaime Hayon. “And spot lamps are usually anonymous and ignored. With the Passepartout Lamps, I wanted a versatile lamp in a decorative design that could easily fit into any type of spatial environment. So we pictured the environment and then we pictured a frame to simply enhance it. Like a Passe-Partout. Et voilà.”

Whether you need lighting for a large, expansive space or a narrow corridor, for a cosy home environment or a welcoming workspace, the Passepartout Lamp emits a light that’s surprisingly calm and tranquil. Add to that built-in LED technology that ensures a high quality light emission that’s also energy-efficient, custom designed so the light is uniformly dispersed throughout a space.

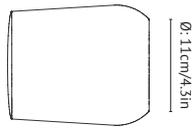

Choose from matt white shades in different shapes that’s decorative without drawing too much attention to itself. Choose one style for a consistent look or group them together to create a unique design statement.

“The Passepartout Lamps were born out of frustration,” admits &tradition’s Brand Director Martin Kornbek Hansen. “We wanted a lamp that was neutral but not entirely invisible. Something architectural but not invasive. A versatile spot lamp that exuded light without being harsh. Hayon’s solution captures the essence of our challenge: to combine decorative and technical lighting into one collection of beautiful options.”

Enjoy this series of subtle yet striking lamps that set a soothing mood wherever you place them.
