

# Fauteuil de Salon

Jean Prouvé, 1939

**vitra.**

## Fauteuil de Salon

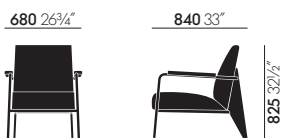

Fauteuil de Salon combines plain surfaces into a complete architectural form with a comfortable seat and backrest. Rediscovered in the archives of the French design engineer, the chair's colour was adapted for modern tastes. Thanks to the armrests in oiled solid wood

and Prouvé's typical philosophy of focusing on design factors, Fauteuil de Salon goes perfectly with other products in the Prouvé Collection.

### Materials

- **Base:** Round and moulded sheet steel, powder-coated.
- **Seat and backrest:** Polyurethane foam; cover material Twill.
- **Armrests:** Solid wood, oiled; natural oak, smoked oak or american walnut.
