

Mirror Ball

A highly reflective shade inspired by the space helmet. Available as a pendant or stand light in three different sizes: 50cm, 40cm and 25cm.

Process	Mirror Ball Floor is formed using a technically advanced process of vacuum metallisation. The process involves vaporising a small amount of pure metal at a very high temperature and then sucking it on to a surface by applying an electrical charge. Extremely small holes can appear at times on the metal coating.
